HEALTH IMAGES

Ambra at Health Images:
Compliance & Security You Can Trust

Ambra Health's solution enables an efficient, HIPAA compliant and secure way to share, store, and view diagnostic images. This means your organization can **securely** and **compliantly** change studies to your PACS and viewing stations with Health Images.

Fully Compliant with HIPAA/HITECH HITRUST

Ambra is committed to ensuring compliance with common regulatory and GxP (GCP) standards including HIPAA/HITECH HITRUST. Ambra cannot and does not send information from an Ambra account without authorization, which is requested securely online with strict audit trails.

SOC 2 Compliance

As a cloud provider, Ambra's data center's SOC 2 compliance ensures adherence to strong security, availability, processing integrity, confidentiality, and privacy best practices.

FDA Class II Viewer

Ambra's 510(k) cleared viewer is FDA Class II compliant, providing you with the assurance that you can manage, view and interpret medical images using a next generation cloud PACS and HTML5, zero footprint diagnostic viewer.

Comprehensive HL7 Support

Ambra is a leader in interoperability, managing bi-directional workflows of both DICOM and HL7 information between systems as well as with third party applications.

Committed To Standards & Interoperability

Ambra is committed to delivering infrastructure, viewer, privacy, and integration compliance that provides confidence and trust.

What This Means For You

*With Ambra Health, you can have confidence that patient studies are managed **securely** and **compliantly***
